PROJECTS

ATM Simulator Application(Core Java)

Technologies: Java, OOP, Collections, Exception Handling

Developed a **Java-based backend application** supporting authentication, balance inquiry, deposits, withdrawals, and fund transfers

Designed **10+ modular classes** using **OOP principles**, improving maintainability and scalability

Implemented **exception handling and input validation**, preventing runtime failures during invalid operations

Utilized Java Collections for efficient account and transaction data management

Performed **debugging and functional testing** to validate business logic and edge cases

Responsive E-Commerce Website

Built a responsive, cross-device compatible UI using semantic HTML and modern CSS.

Implemented Flexbox layouts to improve usability and visual consistency.

ACHIEVEMENTS

- Solved **150+ DSA problems** across **LeetCode** and **GeeksforGeeks**.
- Earned **50-Day Consistency Badge on LeetCode**, demonstrating disciplined problem-solving.
